

UNITED STATES SHIP
CARL VINSON CVN-70

CVN-70

USS CARL VINSON'S NAMESAKE . . .

**Rep. Carl Vinson (D-Ga.)
1883-1981**

Carl Vinson was born in Baldwin County, Georgia, on November 18, 1883, the son of Edward S. and Annie Morris Vinson. He attended Georgia Military College in Milledgeville and was graduated from the Mercer University Law School with an LL.B. degree in 1902, beginning practice on June 5 of that year.

Rep. Vinson's appointment as Baldwin County Prosecutor in 1904 began a career of more than 60 consecutive years of service in public office. In 1909, he was elected to the Georgia General Assembly, serving there until 1912. He returned to Baldwin County in late 1912 to serve as County Court Judge.

On November 3, 1914, he was elected to the United States House of Representatives to fill an unexpired term. He served in Congress for more than 50 years — the longest service of any House Member in our history. Titles such as "Father of our Modern Navy" and "Aviation's Elder Statesman" barely describe his contributions, for few others have done so much for the defense of our country.

Rep. Vinson was among our nation's leading advocates of naval power. More than any other person, he was responsible for the buildup of the U.S. Navy and its air power before World War II. Admiral Nimitz, the Pacific Fleet commander, said of him, "I do not know where this country would have been after December 7, 1941, if it had not had the ships and the know-how to build more ships fast, for which one Vinson Bill after another was responsible."

Carl Vinson's philosophy concerning military preparedness throughout his career is just as valid today. "The most expensive thing in the world is a cheap Army and Navy," he said. "History has shown that weakness invites attack." He supported the policy that our naval strike forces, including ships such as the CARL VINSON should be nuclear-powered.

Rep. Vinson had served a total of 50 years and one month in the House of Representatives when he retired in January 1965. He returned to Milledgeville where he resided until his death on June 1, 1981.

CVN-7

CONSTRUCTION AND COMMISSIONING

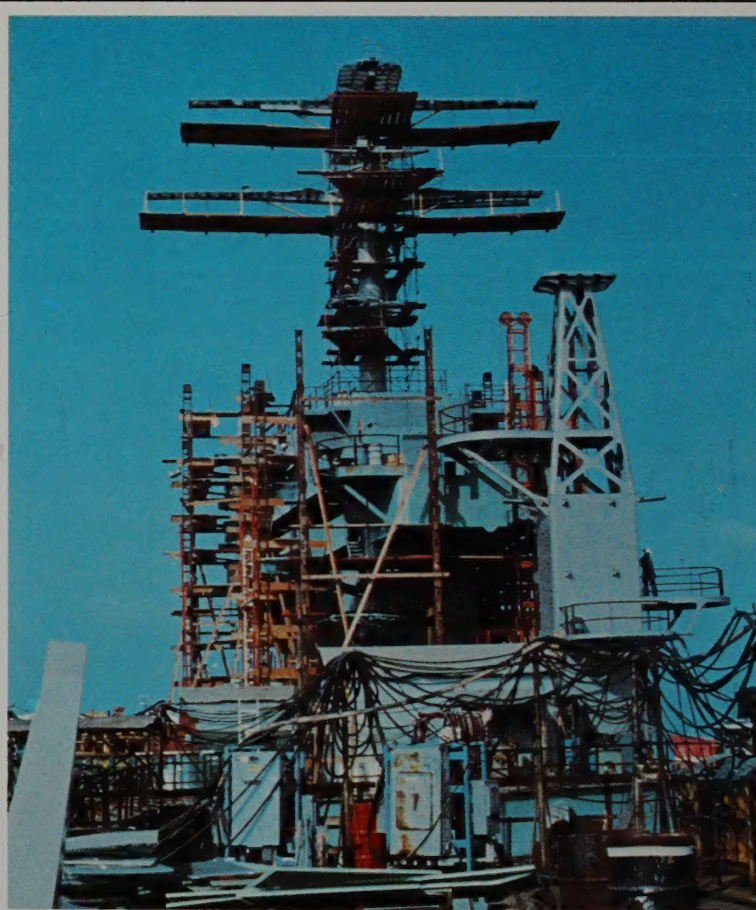

"America is strong, but she is in danger of becoming weak," Rep. Vinson said when the keel of the ship bearing his name was laid on October 11, 1975. "This great aircraft carrier will add strength. But it must not stop here . . . Only with determination on the part of our people to remain militarily strong, will we survive."

When the **CARL VINSON** was christened by the congressman's nurse and long-time friend, Molly Snead, on March 15, 1980, Mr. Vinson was present, making him the first U.S. citizen to see the launching of a Navy ship named in his honor.

"It is impossible for me to find words to express my gratitude for the high honor paid me here today," he said. "No event in my life, no event in my future, can ever equal this day. My cup runneth over. My star has reached its zenith."

*The keel of USS **CARL VINSON** was laid in October 1975 at Newport News Shipbuilding and Drydock Corp. The ship is the third in the series of **NIMITZ** Class nuclear-powered aircraft carriers and was formally commissioned on March 13, 1982. A year after commissioning, the Navy's newest aircraft carrier embarked upon an eight month, around-the-world deployment to its new homeport of NAS Alameda, California, where it is pictured on page 5.*

*The other photos depict USS **CARL VINSON** during various stages of construction.*

CVN-70

CARL VINSON'S MISSION and CAPABILITIES

The primary mission of USS CARL VINSON, the Navy's newest nuclear-powered aircraft carrier is to be ready to employ its power anywhere in the world as directed by the President of the United States.

Only by maintaining its equipment and personnel in the highest state of readiness will the CARL VINSON be capable of carrying out its wide variety of missions including anti-air warfare, anti-submarine warfare, anti-surface warfare and electronic warfare.

A floating city which displaces approximately 95,000 tons of water, it can move day and night at speeds of more than 30 knots.

To serve its nearly 6,000 men, there are most of the facilities found in any small town. Besides living quarters and dining facilities, the ship has a waterworks plant to convert seawater into fresh water, a printing plant to produce everything from training books to a daily newspaper at sea, a weather bureau, machine shops, an oxygen plant, a post office, fire stations, a fully-staffed hospital, stores, a laundry, a library, several television stations, — the list goes on and on. All of this and an airport on the roof.

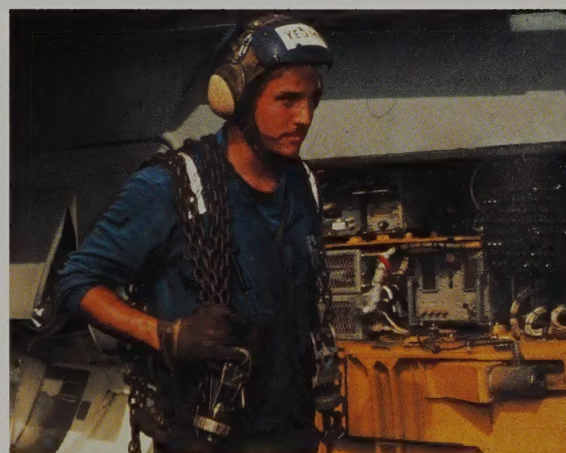

But it is the people who make the CARL VINSON more than a mass of steel plate, electrical cable and pipe. People from every state in the union — officers with decades of military service and others who have just received their college degrees, veteran enlisted men in their 50's and teenaged sailors and airmen away from home for the first time.

Each works in one of 17 specialized departments. Air, Deck, Operations and Reactor to name just four. But leadership, training and a sense of purpose blend nearly 6,000 individual personalities toward one goal — being ever ready to exercise the power of USS CARL VINSON in support of the goals of our country.

Team work required for daily flight operations never stops. Catapult and Arresting Gear officers launch and recover the aircraft. Airmen do many jobs such as refuel aircraft and insure chocks and chains are in place to secure parked aircraft. The Air Boss oversees flight operations from primary flight control while air traffic controlmen direct pilots to a safe return to the moving flight deck.

 Lower Right: The ship's closed circuit television system broadcasts five channels 24 hours a day.

EMBARKED AIRCRAFT

F-14 TOMCAT

The F-14 Tomcat, USS CARL VINSON's fighter aircraft, is designed to protect the carrier from hostile aircraft. The Tomcat is a two-seat, twin engine, all weather aircraft capable of flying twice the speed of sound. The F-14 can carry long range Phoenix missiles in addition to Sparrow and Sidewinder missiles. Flying the F-14 from CARL VINSON are Fighter Squadrons 51 and 111.

EA-6B PROWLER

The EA-6B Prowler is a four-seat, all weather jet designed for use in tactical electronic warfare. Flying in excess of 500 knots, the Prowler uses sensitive receivers and high power jammers in an effective combination to deny the enemy use of much of his radar and radio equipment. The sophisticated electronic systems of the EA-6B make it one of the most expensive aircraft in the Air Wing. Tactical Electronic Warfare Squadron 134 flies the EA-6B from CARL VINSON.

A-7E CORSAIR

The A-7E Corsair is a single-seat light attack aircraft. It was designed for a multitude of missions, including carrying firepower to distant targets, close air support and intercepting enemy aircraft. The aircraft is capable of carrying a variety of weapons totalling its own weight, and serves as an excellent platform for attack missions. The Corsair is flown from CARL VINSON by Attack Squadrons 27 and 97.

E-2C HAWKEYE

The E-2C Hawkeye, with the distinctive rotating radar dome, is an airborne early warning, all-weather defensive aircraft. The computers, radar, and communications equipment in the E-2C are used to facilitate wide air strike and traffic control, area surveillance, search and rescue missions, navigational assistance, and computer relay. The E-2C, nicknamed the "Hummer", is flown from the deck of CARL VINSON by Carrier Airborne Early Warning Squadron 114.

S-3A VIKING

The S-3A Viking provides an ideal balance of anti-submarine systems and computer technology to enable it to collect, process, interpret, and store data. With a crew of four, and an endurance time of more than seven hours, the Viking is used primarily for search missions in the vicinity of the carrier task force. The Viking is flown from CARL VINSON by Air Antisubmarine Squadron 29.

SH-3H SEA KING

The SH-3H Sea King is a gas turbine powered helicopter used for antisubmarine warfare, rescue and assistance missions, and transfer of cargo and personnel between ships at sea. The Sea King helicopters are airborne during all flight operations. Helicopter Squadron 4 flies the Sea King from USS CARL VINSON.

A-6E INTRUDER

The A-6E Intruder is a medium level attack bomber designed to deliver a variety of ordinance on targets completely obscured by inclement weather or darkness. Flown by a crew of two, the A-6E can carry five 2,000 pound bombs or twenty-eight 500 pound bombs. The A-6E is flown from CARL VINSON by Attack Squadron 52. The squadron also flies the KA-6D model of the Intruder, which is a tanker version used for in-flight refueling.

ABOUT USS CARL VINSON (CVN-70)

Builder	Newport News Shipbuilding and Dry Dock Company, Newport News, Virginia
Keel Laid	October 11, 1975
Launched	March 15, 1980
Commissioned	March 13, 1982
Total Cost	Approximately \$1.3 Billion
Propulsion	Nuclear, with enough fuel for 15 years of normal operations (the equivalent to 11 million barrels of propulsion fuel oil)
Number of Reactors	2
Speed	More than 30 knots
Length over Flight Deck	1,092 feet
Breadth at Flight Deck	252 feet
Area of Flight Deck	4.5 acres
Number of Aircraft Elevators	4
Number of Aircraft Catapults	4
Height, Keel to Mast Top	244 feet (equal to a 24-story building)
Number of Compartments and Spaces	3,360
Anchors	2 anchors, 30 tons each
Weight of Links in Anchor Chain	360 pounds each
Combat Load Displacement	Approximately 95,000 tons

PURSUIT OF EXCELLENCE

USS CARL VINSON, the Navy's newest and largest nuclear-powered aircraft carrier with embarked Carrier Airwing FIFTEEN, recently completed its second major deployment, which included an extensive Indian Ocean period under the direction of Commander Seventh Fleet. The deployment was a great success in all aspects of demonstrating mission readiness and our determination to preserve peace.

The scope and breath of this book encompasses all the events that have transpired since the arrival of USS CARL VINSON to its new homeport of Naval Air Station Alameda, Calif., on Oct. 29, 1983, and the subsequent completion of the ship's second major deployment on May 24, 1985.

The ship/airwing team continually reflected, in its daily performance, the theme "Pursuit of Excellence." Throughout workups and the deployment, the ship and its crew consistently demonstrated pride, professionalism and the determination to carry out all evolutions in "Battle Star" style. The results have been evident in the divisional, departmental, squadron and ship awards received during this period of the ship's history.

In the following pages, relive and share the memories in the pursuit toward excellence during the 1984-85 deployment to the Western Pacific and Indian Ocean.

Sincerely,

D.E. ALTARAS
CAPT USN
Cruisebook Chairman

REAR ADMIRAL WALTER T. PIOTTI

U.S. NAVY

COMMANDER, CRUISER DESTROYER GROUP FIVE
COMMANDER, BATTLE GROUP CHARLIE OCT 1984-FEB 1985

Rear Admiral Walter T. Piotti was born in Newton, Mass., on April 19, 1934. He graduated from the Massachusetts Maritime Academy in 1956 with a degree in marine and electrical engineering.

Upon commissioning, he was ordered to the U.S. Naval Communications Facility, Port Lyautey, Morocco, for duty. He subsequently served as Engineering Officer aboard the destroyers USS MCKEAN (DDR-784) and USS CUSHING (DD-797). He was part of the commissioning crew of USS KING (DLG-10), serving as Weapons, and subsequently, Executive Officer. Additional sea duty included tours as Executive Officer, USS RICHARD E. KRAUS (DD-849); Commanding Officer, USS LESTER (DE-1022); Commanding Officer, USS GOLDSBOROUGH (DDG-20); and Commanding Officer, USS CHICAGO (CG-11).

RADM Piotti is a 1964 graduate of the U.S. Naval Post

Graduate School of Monterey, Calif. He has served ashore as Head of the Long Range Weapons Control Section, Bureau of Naval Weapons; Head of the Surface Missile Branch, Office of the Chief of Naval Operations; Special Assistant, Surface Warfare and later Executive Assistant and Senior Aide to the Director, Navy Program Planning; and as Executive Assistant to the Commander in Chief, U.S. Pacific Fleet. Most recently, RADM Piotti served as Director, Mobile Logistic Support Forces, Amphibious, Mine and Advanced Naval Vehicles Ship Division and subsequently, as Director, Surface Warfare Division in the Office of the Chief of Naval Operations.

RADM Piotti is married to the former Ruth Marie Giroux, also of Newton, Mass. The Piotti's have three children: Walter Scott, Karen Leslie and Elaine Michele.

REAR ADMIRAL JOHN R. BATZLER

U.S. NAVY

COMMANDER, CARRIER GROUP THREE

COMMANDER, BATTLE GROUP CHARLIE FEB-MAY 1985

Rear Admiral John Richard Batzler, son of Mr. and Mrs. William E. Batzler, was born in Battle Creek, Mich., on Dec. 9, 1932. A graduate of La Jolla High School, La Jolla, Calif., he also attended the University of California at Berkeley, receiving a Bachelor of Arts degree in mathematics.

Commissioned an ensign in the U.S. Navy in June 1955, RADM Batzler reported for flight training in Pensacola, Fla., and received his wings in January 1957. As a photo reconnaissance pilot with VFP-63, he completed deployments to the Western Pacific aboard USS BON HOMME RICHARD (CVA-31) and USS ORISKANY (CVA-34). RADM Batzler served for one year at the U.S. Naval Academy as a mathematics instructor and three years at the Naval Air Test Center, Patuxent River, Md., as a graduate Navy test pilot and project pilot in the Weapon Test Systems Division. Reporting to Fighter Squadron 31 in November 1965, he served as Maintenance and then Operations Officer aboard USS SARATOGA (CV-60). A west coast tour with Fighter Squadron 96 followed, where RADM Batzler served as the squadron's Operations Officer while completing his first combat tour to Southeast Asia on USS ENTERPRISE (CVN-65). U.S. Naval Postgraduate School followed, culminating in a Masters Degree in computer systems management in 1969. In 1970, he reported to Fighter Squadron 24 as Executive Officer and became Commanding Officer in July 1971.

Following a year of nuclear propulsion engineering training in June 1973 and a short tour on the staff of Commander Naval Air Force, U.S. Pacific Fleet, he reported to USS ENTERPRISE (CVN-65) as Executive Officer in January 1975.

In January 1977, RADM Batzler assumed command of the Pearl Harbor-based USS ASHTABULA (AO-51). In February 1979, RADM Batzler became the Commanding Officer of USS NIMITZ (CVN-68). The highlight of this tour was the shooting down of two Libyan SU-17 Fitter aircraft by NIMITZ-based VF-41 TOMCATS. After his change of command on NIMITZ in February 1982, he was promoted to flag rank and was assigned to the organization of the Joint Chiefs of Staff as the Deputy Director for Operations (Reconnaissance, Space, Electronic Warfare, and C3 Countermeasures).

RADM Batzler assumed command of Carrier Group THREE on board USS ENTERPRISE (CVN-65) June 25, 1984.

RADM Batzler has flown more than 50 different Navy aircraft, and his combat experience includes more than 270 missions in Vietnam. RADM Batzler's awards include the Legion of Merit, Distinguished Flying Cross, Bronze Star, numerous Air Medals, Navy Commendation Medal and various service and campaign ribbons for participation in the Vietnam conflict.

RADM Batzler is married to the former Carolyn Wright of Exeter, Calif. They have three children: Michael, Karen, and Gregory Shane.

REAR ADMIRAL JOHN W. NYQUIST

U.S. NAVY

COMMANDER, CRUISER DESTROYER GROUP 5
COMMANDER, BATTLE GROUP CHARLIE MAY 85

Rear Admiral John W. Nyquist, son of the late RADM Walfred Nyquist, USN (Ret.), and Irma Beske Nyquist, was born in San Diego, Calif. He entered the U.S. Naval Academy in 1951 after a year at the University of Minnesota.

Following graduation from the Naval Academy in 1955, RADM Nyquist reported to USS OZBOURN (DD-846) and served in the Engineering Department. Other sea duty has included Executive Officer, USS PRIME (MSO-466); Weapons Officer, USS COCHRANE (DDG-21); Executive Officer, USS SEMMES (DDG-18); and Commander Destroyer Squadron THIRTY-SIX. RADM Nyquist also served in the Republic of Vietnam with the Joint U.S. Public Affairs Office from 1968 to 1969.

Shore assignments have included ordnance engineering studies at the Naval Post Graduate School, Monterey, Calif.; duty on the staffs of Commander Antisubmarine Warfare Force, Pacific; the Bureau of Naval Personnel; and two tours in the Office of the Chief of Naval Operations, including duty as Executive Assistant

to the Deputy Chief of Naval Operations (Surface Warfare).

Following his selection to flag rank in February 1981, RADM Nyquist was ordered as Director, Command and Control Support Systems and Information Systems Division, where he served from May 1981 to September 1982. He was then reassigned within the Office of the Chief of Naval Operations as Director, Surface Combat Systems Division, where he served until February 1985. RADM Nyquist assumed command as Commander Cruiser Destroyer Group FIVE, homeported in San Diego, Calif., on May 5, 1985.

RADM Nyquist has been awarded the Legion of Merit with two gold stars, the Bronze Star, the Meritorious Service Medal, the Navy Commendation Medal with Gold Star, and the Meritorious Unit Commendation. He is married to the former Penelope Ann Lyon of Menlo Park, Calif. The Nyquists have two children, Tom and Andrea.

CAPT David W. Hoffman
Chief of Staff

DESRON-31

Destroyer Squadron THIRTY-ONE was originally established in September 1939. During World War II, the squadron operated in the Atlantic on escort and antisubmarine duties. Disestablished after World War II, it was reactivated from Feb. 1, 1968, to Jan. 1, 1970, and operated in the waters of Southeast Asia as a unit of the Seventh Fleet. Reconstituted a second time on June 15, 1971, DESRON-31 conducted significant combat operations off South Vietnam with the Seventh Fleet in February 1972.

During the remainder of the 1970's and the early 1980's, DESRON-31 deployed to the Western Pacific and Indian Oceans five times and participated in numerous fleet exercises, including exercises with units from Australia, New Zealand and Great Britain.

DESRON-31 has been a part of Battle Group CHARLIE as early as 1981 in company with USS CORAL SEA (CV-43) and later with USS CARL VINSON (CVN-70) in 1983 and 1984. DESRON-31 is a unit of Cruiser Destroyer Group FIVE.

CAPTAIN THOMAS

A. MERCER

U.S. NAVY

COMMANDING OFFICER, USS CARL VINSON

Captain Thomas A. Mercer, born in Pensacola, Fla., graduated from the United States Naval Academy in 1962.

After short tours as an instructor at the Naval Academy and service on board USS RANDOLPH (CVS-15), CAPT Mercer entered flight training and was designated as a Naval aviator in February 1964. After A-4C training with VA-44, he reported in August 1964 to VA-172 for a three-year tour, during which he completed two Mediterranean cruises and one Southeast Asia combat deployment on board USS FRANKLIN D. ROOSEVELT (CVA-42).

In August 1967, he reported to the U.S. Naval Post Graduate School in Monterey, Calif., where he received his Master's Degree in aeronautical engineering in September 1969.

Subsequently, CAPT Mercer underwent training in the A-7E Corsair II at NAS Lemoore and reported to VA-195 as the squadron was transitioning to the CORSAIR in March 1970. With VA-195 he made two combat deployments to Southeast Asia on board USS KITTY HAWK (CV-63). After a 2½ year tour at the Bureau of Naval Personnel as the Light Attack Placement Officer, he completed refresher training in the A-7E and then joined VA-82 as Executive Officer in July 1975.

The squadron deployed on board USS NIMITZ (CVN-68) for its initial refresher training and a deployment to Northern

Europe. In November 1976 he assumed command of VA-82 while embarked aboard NIMITZ on its first Mediterranean deployment.

Following this tour, CAPT Mercer attended nuclear power training in Orlando, Fla., and nuclear prototype training in Idaho Falls, Idaho, prior to reporting to USS ENTERPRISE (CVN-65) in July 1979 as Executive Officer.

In September 1981 he assumed command of USS GUADALCANAL (LPH-7) in Palma, Majorca, and completed two Mediterranean deployments and three major exercises to Northern Europe and the Caribbean, detaching from GUADALCANAL off Lebanon in March 1983. He assumed command of USS CARL VINSON (CVN-70) on July 30, 1983, as CARL VINSON was deployed in the North Arabian Sea.

Among his awards are the Distinguished Flying Cross (three awards), four individual Flight Air Medals, 25 "Strike/Flight" Air Medals and six Navy Commendation Medals. He has logged over 3,500 hours in the A-4C and A-7E aircraft and has made 900 carrier landings.

CAPT Mercer is married to the former Delta Rebecca Krauss of Pittsburgh and they reside in Alameda with their son, Bill. Their other son, Thomas Jr., is a midshipman at the Naval Academy.

CAPTAIN DOYLE J. BORCHERS II

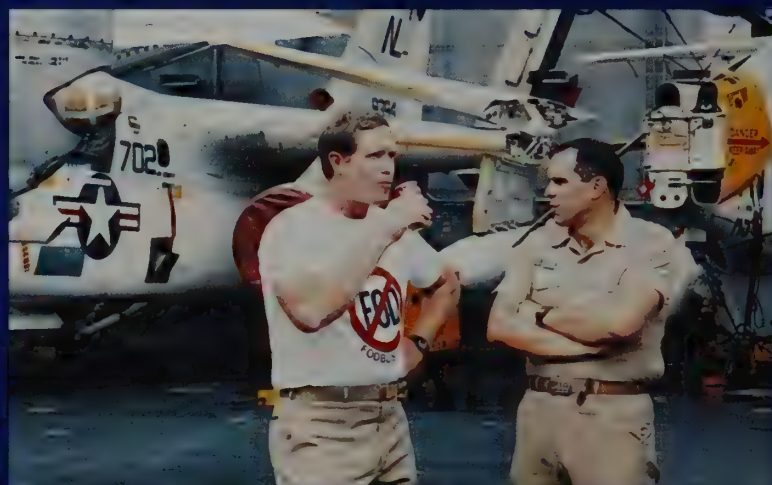

U.S. NAVY

EXECUTIVE OFFICER, USS CARL VINSON

government of Iran. He became Executive Officer of Fighter Squadron ONE in January 1979 and commanded VF-1 from January 1980 to May 1981 aboard USS RANGER during a WESTPAC/Indian Ocean cruise, during which he introduced VECTOR LOGIC tactics to the Seventh Fleet. From June 1981 to May 1982 he was head of Tactical Air Analysis at the Pentagon in OP-96. After being selected to command the F-14 readiness squadron, VF-124, he accepted orders to nuclear power training. He subsequently attended Nuclear Power School in Orlando, Fla.; the NPTU at Idaho Falls, Idaho; and the PCO course at Naval Reactors, Wash., D.C. His awards include the individual Air Medal, seven "Strike/Flight" Air Medals and the Navy Commendation Medal with Combat V.

CAPT Borchers reported as Executive Officer of USS CARL VINSON in November 1983. He is married to the former Jeanne Luberdia of Washington, D.C. The Borchers have two children, John and Gwendolyn.

Captain Doyle John Borchers II was born in Boerne, Texas, on May 13, 1942. He entered the U.S. Naval Academy in 1961.

Commissioned in June 1965, CAPT Borchers entered flight training and received his wings in February 1967. He reported to VF-101, NAS Oceana, Va., for training in the F-4B/J PHANTOM II and was assigned to VF-33, flying 130 combat missions over North Vietnam in the PHANTOM.

CAPT Borchers graduated from the U.S. Naval Test Pilot School in Patuxent River, Md., and was assigned to the Weapons Systems Test Division at the Naval Air Test Center as an F-14 project test pilot, where he was nominated as NATC's Test Pilot of the Year and was a member of the F-14 Joint Evaluation Team at the Naval Missile Center, Pt. Mugu, Calif. There he participated in the Navy Preliminary Evaluations and Board Inspection and Survey Trials for the F-14A TOMCAT and was the first Navy pilot to fire a Phoenix Missile with a live warhead against an airborne target.

In 1977, at Naval Air Systems Command, he was Deputy Program Manager for F-14A training for both the Navy and the

ABCM DONALD K. WETZEL COMMAND MASTER CHIEF

Master Chief Petty Officer Donald K. Wetzel served as USS CARL VINSON's Command Master Chief Petty Officer since he reported aboard in January 1983, bringing with him over thirty years of leadership and professional expertise.

Originally from Norristown, Pa., he enlisted in February 1948. He served on active duty for more than 22 years before transferring to the Fleet Reserve in October 1970. In June 1977 he was recalled to active duty.

He has been assigned to 14 different duty stations throughout his career as an Aviation Boatswains Mate; CARL VINSON was his seventh aircraft carrier.

His assignments have included: USS FRANKLIN D. ROOSEVELT (CVB-42); USS PHILLIPINE SEA (CV-47); VR-1 NAS Patuxent River, Md.; USS MIDWAY (CVA-41); USS SARATOGA (CVA-60) (precommissioning crew); FASRON-111, Naval Station Bermuda, British West Indies; VX-1, NAS Key West, Fla.; USS INTREPID (CVA-11); Fleet Work Study Group LANT, NOB Norfolk, Va.; Naval Station, Rota, Spain; USS INDEPENDENCE (CVA-62); HS-11, NAS Jacksonville, Fla.; HC-16, NAS Pensacola, Fla.; and USS CARL VINSON (CVN-70).

Master Chief Wetzel has received 12 different awards during his career, including eight Good Conduct Awards, the Korean Service Medal, Navy Achievement Medal, three Meritorious Unit Commendations, and one Navy Unit Citation.

Prior to being recalled, CVN-70's Master Chief of the Command obtained a Bachelor of Science degree in management from Jones University, Orlando, Fla.

He is married to the former E. Ruth Vaught and they recently celebrated their thirtieth anniversary. They are the parents of three children: Donna, Donald K. Jr., and Doreen.

After more than thirty years of active duty, Master Chief Wetzel retired August 1, 1985.

CORREGIDOR

DERIVED ITS NAME FROM CORREGIMIENTO OR MUNICIPAL DISTRICT. ABOUT 1225 THE ISLAND BECAME A STRONGHOLD FOR CHINESE PIRATES UNTIL THE LATTER WERE DRIVEN BY THE MOROS. BECAME SPANISH POSSESSION, 1570, WHEN SPANIARDS ARRIVED IN MANILA FROM PANAY. OCCUPIED BY THE DUTCH, 1600. RECAPTURED BY THE SPANIARDS AS A FORTIFICATION BESIDES BEING USED AS LIGHTHOUSE, DOCKYARD, NAVAL CONVALESCENT HOSPITAL, PENAL COLONY, AND CHECKING POINT FOR SHIPS TO HAVE THEIR PAPERS CORRECTED. SURRENDERED WITHOUT RESISTANCE TO ADMIRAL DEWEY, MAY 6, 1898. FIRST OCCUPIED BY THE AMERICANS AS A CONVALESCENT HOSPITAL, NOVEMBER 14, 1904, AND FIRST GARRISON, THE 35TH COMPANY, C. A. C., COMMANDED BY CAPTAIN C. E. KILBOURNE, ARRIVED, MAY 8, 1908. BECAME THE SEAT OF THE GOVERNMENT OF THE COMMONWEALTH OF THE PHILIPPINES DURING WORLD WAR II AND THE SCENE OF PRESIDENT QUEZON'S TAKING OATH OF OFFICE ON HIS SECOND TERM. PRESIDENT QUEZON AND HIS FAMILY SOUGHT SHELTER AT MALINTA TUNNEL, DECEMBER 24, 1941. OCCUPIED BY THE JAPANESE, MAY 6, 1942; RETAKEN BY THE AMERICANS, MARCH 2, 1945. TURNED OVER TO THE REPUBLIC OF THE PHILIPPINES, OCTOBER 12, 1947.

SHIP'S COMPANY

ADMIN

The Administrative Department, under the auspices of the X.O., provides a variety of personnel and morale services to the ship's crew and embarked squadrons.

The Personnel Office handles each enlisted crew member's service record and other accounting information. The Ship's/Captain's Office oversees officers' records and accounting, as well as providing various reports and correspondence to the C.O. for his review and approval.

The Post Office handles all incoming and outgoing personal and official mail. The Print Shop is tasked with providing various printing services.

Enforcing CARL VINSON's rules and regulations is the responsibility of the Master-at-Arms and Brig Force. The Legal Office provides professional legal counseling and is the C.O.'s advisor in processing infractions. The Career Counselor's Office handles reenlistments and discharges.

The Public Affairs Office provides liaison services to the various news media and is the C.O.'s representative in sponsoring visitors. The PAO operates the television and radio stations and produces the ship's daily newspaper. Special Services provides recreational services, including tours and athletic activities.

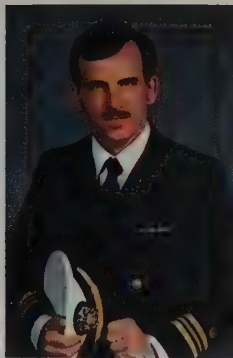

Coordinating all of these services is the Admin Officer's responsibility.

ADMIN

AIMD

The Aircraft Intermediate Maintenance Department, AIMD, maintains the facilities, equipment, and aircraft repair components needed to support CVW-15 operations, aircraft maintenance and material movement.

The department is divided into four divisions:

IM-1 handles administration, maintenance/material control and quality assurance.

IM-2 provides testing, repair and manufacturing for power plants, airframes/hydraulics and survival equipment.

IM-3 Division tests, troubleshoots and repairs most of the aviation electronics for CVW-15.

IM-4 supports and repairs CARL VINSON's "yellow gear," ground support and armament equipment.

SHIP'S BANDS

ADMIRAL FLATLEY AWARD

DEPARTMENT

AIR DEPARTMENT

USS CARL VINSON's Air Department handles, fuels, launches and recovers aircraft and maintains the catapults and arresting gear.

Air Department coordinates administrative functions, mans primary flight control, PRIFLY, and oversees all aircraft movements, whether landing, launching or re-spotting on the flight deck.

Hangar Deck Control handles all the spotting and operations in the hangar bays, including the spotting and operations of CARL VINSON's four deck edge elevators.

One of its other jobs is operating and maintaining all aviation fueling systems on board.

Men assigned to the Air Department work as aircraft directors, handlers, crash firefighters, elevator operators, aviation support equipment operators and as damage control team members.

Air Department is responsible for the safe delivery of the fleet's highest quality fuel to CARL VINSON/CVW-15 aircraft.

CHAPLAIN

The Chaplain Department on board CARL VINSON, established May 21, 1984, provides personnel of all faiths the opportunity to meet their religious needs.

In addition to providing religious services, the chaplains are available to assist crewmembers in other appropriate matters. They provide instruction leading to holy baptism and/or to church membership and offer opportunities for study and deeper exploration into the scriptures.

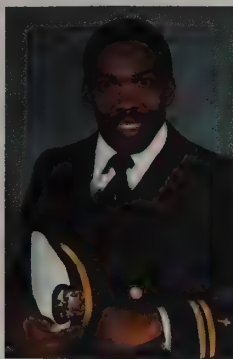

The Chaplain Department also manages CARL VINSON's library/lounge complex, which is used by 200-600 people each day while at sea. Along with the library/lounge, the Chaplain Department is in charge of the ship's chapel, which houses approximately 45 services every week.

COMMUNICATIONS

Communications Department's two divisions, CR and CS, ensure CARL VINSON's "voice with the stars" remains open.

The men of CR Division utilize highly sophisticated communications equipment combined with an automated message distribution system to process over 1,500 messages daily, keeping the crew aware of what is happening over the horizon.

Whether it's a voice circuit for tactical air control, an American Red Cross birth notice, or a birthday wish sent from home, the professionals of CR Division deliver.

The men of CS Division provide reliable, secure and rapid communication at the speed of light.

During periods of radio silence, flag hoist, semaphore and flashing light are the primary methods of sending and receiving tactical and maneuvering information when steaming in company with other ships. They provide the officer of the deck with visual identification and position of other ships around CARL VINSON. During inport visits, when visitors are aboard or for official ceremonies on board, the signalmen contribute to the event by hanging the colorful signal flags in the hangar bay, "full dressing" the ship if required.

DECK

Lt. S.B. Sladon

CWO2 Charles McGrath

Deck Department is a 24-hour-per-day operation both inport and underway.

From operating the incinerator to issuing paint for the entire ship and airwing, Deck Department provides strong support to the crew's efforts to keep CARL VINSON the cleanest, sharpest-looking carrier in the fleet.

Deck's bridge watch teams man the ship's critical control stations underway.

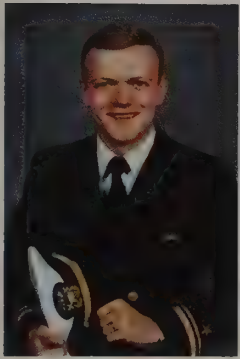

Deck also mans several key repair lockers and unit lockers at general quarters.

Deck upkeep the ship's two thirty-ton anchors and maintains the ship's forecastle, which is used as the anchor chain handling area. The forecastle is also used for meetings, religious programs and other ceremonial functions.

Deck Department receives and stores fuel from various stations around the ship and when necessary, refuels other ships in the Battle Group steaming in company with CARL VINSON.

DENTAL

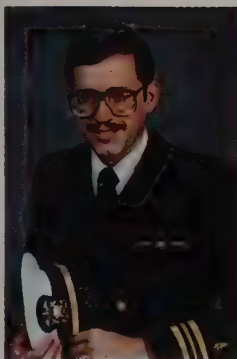

The Dental Department serves to maintain the oral health of CARL VINSON's crew.

All aspects of dental treatment commonly available at a shore-based command are provided onboard.

Additionally, CARL VINSON's Dental personnel, in conjunction with the Medical Department, actively participate in all general quarters and mass casualty evolutions.

ENGINEERING

ENGINEERING

CDR Patrick C. Mackin
Engineer Officer

The men of Engineering Department harness steam power for both the ship's propulsion and the many hundreds of other auxiliary services controlled by Engineering.

Supplying the ship's air conditioning and ensuring proper auxiliary steam flow is the responsibility of the men of A Division, who handle the four emergency diesel generators and electro-hydraulic mechanisms that turn the ship's rudders.

Controlling over 40 million watts of electrical power is the task of E-1 Division, which maintains the ship's electric generators. E-2 Division maintains all the ship's interior communications, alarms and indicating systems and the ship's gyro compass. E-2 Division operates the entire electrical distribution system outside the propulsion plants, including all lighting and electrically operated equipment.

R-Division's hull technicians weld, repair watertight hatches and man nucleus fire party teams which combat all fires, flooding and shipboard damage.

Meanwhile, M-Division operates and controls the main engines, generators and distilling plants, all essential equipment keeping CARL VINSON operational.

SCRAPBOOK **ENGINEERING**

USS CARL VINSON'S 1984 Sailor of the Year

IC1 Berresford A. Bingham, USN

Petty Officer 1st Class Berresford A. Bingham, an interior communications technician in the ship's Engineering Department, is a man whose goal is to become a chief warrant officer, because it means he'll be a technical expert in his field and one of the best.

As an IC1 aboard USS CARL VINSON, Bingham supervises 36 men and is leading petty officer for E-2 Division. He's responsible for maintaining the alarm and indicating systems for Engineering and Navigation Departments, the ship's "gyro," which indicates the ship's heading and course, and the ship's telephone system.

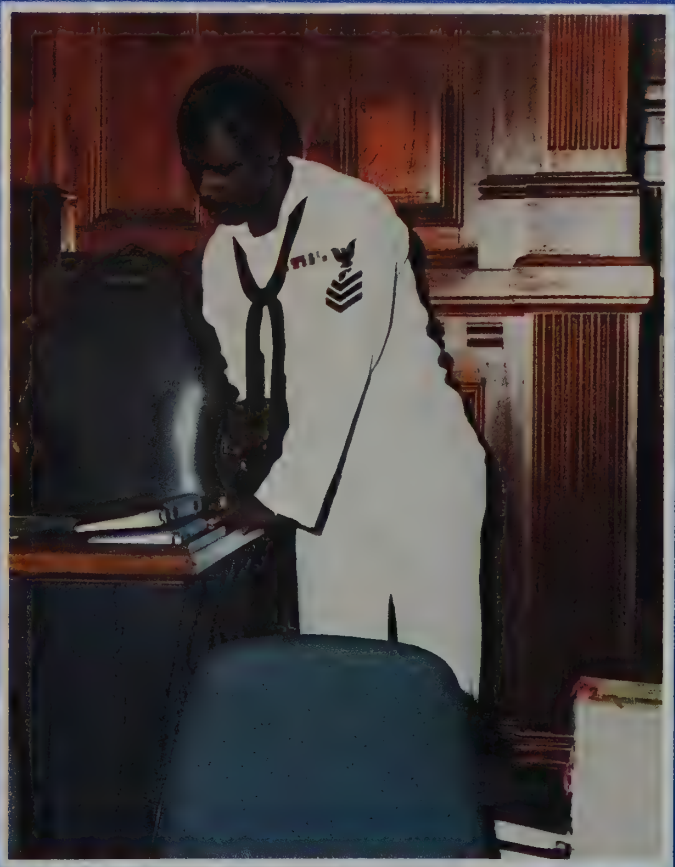

To help him in his job, he's had extensive training besides the IC "A" school. He has attended three "C" schools, earning specialties to work with various systems on CARL VINSON and

other ships.

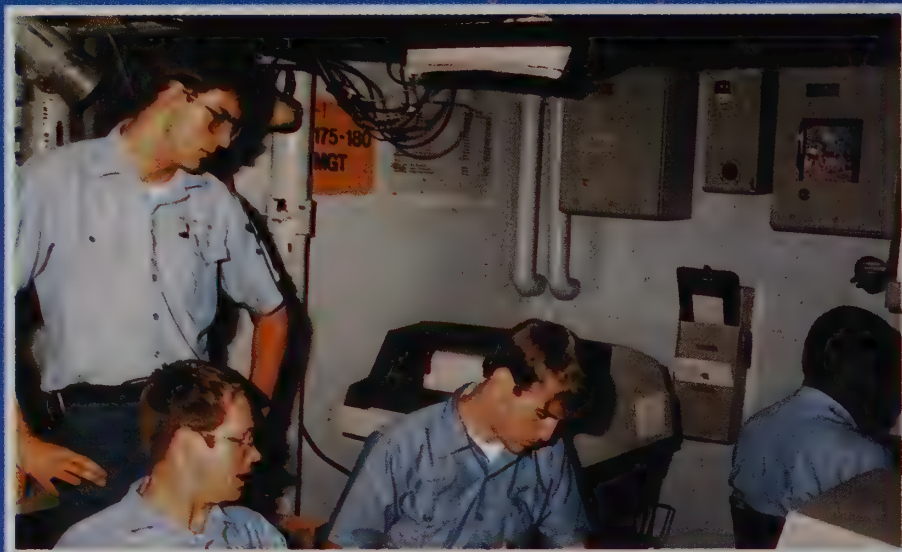

Born in Montego Bay, Jamaica, in 1946, he joined the Navy in September 1974 in Hartford, Conn. His first duty was aboard USS LEXINGTON (CVT-16), where he spent his first year mess cooking and compartment cleaning. Assigned to E Division, he decided to become an IC. In July 1976, Bingham was sworn in as a U.S. citizen and he soon went to IC "A" school in San Diego, Calif.

Bingham and his wife Kathy live in base housing at Naval Air Station Alameda, Calif., with their children: Kenya, 7; Jovon, 6; and Brian, 2.

Bingham was named Sailor of the Quarter for Engineering for the last two quarters of 1984, as well as Engineer of the Year for 1984.

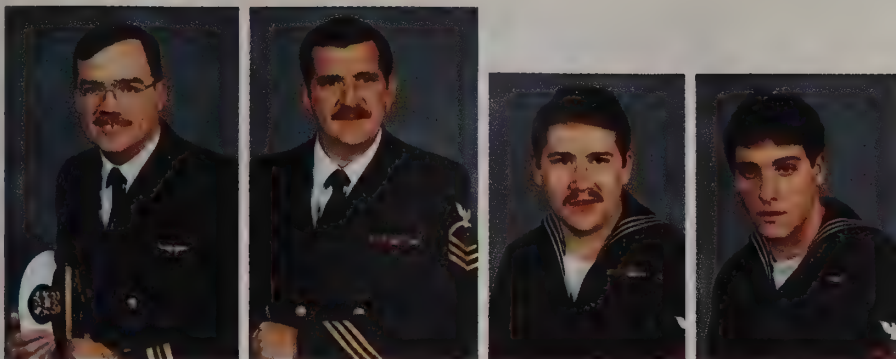

MANAGEMENT

The mission of the Management Information Systems Department is to provide management information services for the shipboard environment with special emphasis given to the transfer of state-of-the-art computer technologies in support of the overall mission of USS CARL VINSON (CVN-70). The Management Department on board CARL VINSON is responsible for providing administrative services through word processing and service record data base support; state-of-the-art shipboard inventory control through the Shipboard Non-Tactical ADP Program; and state-of-the-art shipboard information systems development and support through a special program designed for more effective transfer of computer technology to the shipboard environment.

SCRAPBOOK

MARDET

USS CARL VINSON's Marine Detachment performs the traditional sea duty missions for which Marines are properly organized, equipped and trained.

The hand-picked Marines assigned are predominantly infantrymen, considered qualified to perform special sea duty.

They comprise the ship's security force for the primary purpose of safeguarding the security of weapons and the spaces in which they are stored and maintained.

Various other security functions, either assigned, implied or assumed place the Marines in other areas of the ship, including hangar bays and on the flight deck.

Stretcher bearers for medical emergencies and mass casualty situations are furnished by the detachment as well as two .50 caliber gun mount teams during general quarters.

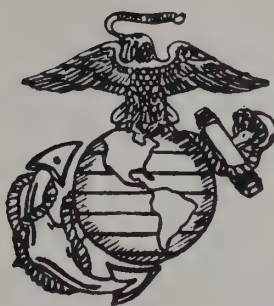

MARDET provides the main resources for honors ceremonies for visiting dignitaries, including heads-of-state.

As a contingency plan, CARL VINSON's Marines are prepared to go ashore as an advance combat landing force during raid operations if directed to do so by higher authority.

MARDET

MEDICAL

CDR Truman E. Long
Medical Officer

USS CARL VINSON's Medical Department provides a full range of diagnostic and treatment services each day to the 5,000 citizens of this floating city.

Additionally, the medical team is ready to respond at once to any medical emergency, whether it is a single injury or mass casualties.

CARL VINSON's hospital boasts a well-equipped operating room, intensive care unit, isolation rooms, X-ray, physical therapy facilities, pharmacy and a complete physical examination section.

The Medical Department maintains the health, safety and well-being of the crew via a comprehensive preventive medicine program, which includes inspecting food supplies, galley areas, drinking water, rest rooms, ship's laundry and berthing spaces.

The Medical Department oversees an active industrial hygiene program.

NAVIGATION

Getting the CARL VINSON where she has to go is up to the Navigation Department.

Navigation is responsible for the safe navigation of the ship through both inland and international waters.

This busy department is one of the smallest on board and is tasked with manning the helm, lee helm and after steering with master helmsmen during all special evolutions, such as sea and anchor details, entering and leaving port, underway replenishments and general quarters.

Although CARL VINSON is equipped with the latest in electronic navigational aids, the ship's quartermasters must continually verify the ship's position like the sailors of old, using dead reckoning, visual fixes and celestial navigation.

OPERATIONS

A man wearing glasses and a light-colored shirt is seated in a control room, looking at a computer monitor. The monitor displays the text "DE II". The room is dimly lit, with the primary light source being the glow from the monitor and other equipment. The overall color palette is dominated by dark blues and greys, with the yellow text at the top providing a strong contrast.

OPERATIONS

CDR Tom McClelland
Operations Officer

Operations Department's divisions are responsible for the collection, analysis, and dissemination of information and tactical data that is vital to the ship's mission.

The Combat Information Center tracks all air, surface and subsurface contacts, standing ready to direct CARL VINSON's aircraft and missile systems against real or simulated threats opposing the Battle Group. The Intelligence Center supports this operation by providing timely information on current military and political events, photographic reconnaissance interpretation, and briefing and debriefing of all aircrews. The Meteorological Office keeps the battle group informed of the latest weather conditions while the Carrier Air Traffic Control Center ensures the safety of aircraft in the control zone surrounding CARL VINSON. The Electronic Material Office maintains all the ship's radars and various other electronic systems while the Photographic Laboratory provides general purpose and intelligence related photography of the ship, airwing, embarked staff and others ships in the Battle Group.

Strike Operations coordinates all long and short range planning for the ship while OPS Admin supports the administrative workload of the department.

REACTOR

REACTOR

Reactor Department oversees the operation of two nuclear reactors that supply the power to drive the ship, generate electricity, catapult aircraft and produce water.

Through alert watch standing, constant training and skillful operation of equipment, the five Reactor Department divisions have upheld a safe and efficient reactor operating record.

Reactor Training division trains all nuclear watchstanders; Reactor Mechanical division operates the propulsion plant turbines and pumps; Reactor Electrical division operates all of the electrical equipment; Reactor Controls division operates reactor control and instrumentation equipment; and Reactor Laboratory division oversees all water chemistry control and radiological controls.

SAFETY

USS CARL VINSON is the result of many years of ship building and warfare evolution which, while producing an awesome force, has also yielded a complex variety of hazards for men and machines. The Safety Department facilitates the safety performance of all hands by investigating, reporting and analyzing mishaps which occur onboard. The department also provides safety training by producing magazines, news letters and television productions which describe hazards of shipboard life and thereby increase safety awareness.

Through the hard work of all hands, the ship was awarded the Admiral Flatley Memorial Award for 1984 to recognize its overall contribution to aviation safety, which surpassed all other U.S. Navy carriers.

SUPPLY

SUPPLY

USS CARL VINSON's Supply Department, the largest department on board, supports the ship in all material logistic areas. In addition, the Supply Department provides essential crew support services.

S-1 is responsible for the inventory and financial control of 110,000 line items of repair parts and general consumables.

S-2 Division personnel dedicate themselves to providing the best possible food service to the 5,000 sailors of CARL VINSON.

S-3, the Sales Division, manages six retail outlets including the VINSON Mall and 7-11 store. Additionally, the barber shops and ship's laundry are run by S-3.

S-4, the Disbursing Office, maintains the accuracy of personal financial record of each crew member.

S-5, the Wardroom Mess, provides food and hotel services for 500 officers while embarked aboard CARL VINSON.

S-6 is the Aviation Support Division and tracks the stock posture of over 5,000 high-usage aviation repair items.

S-8, the Material Division, maintains 36 storerooms and is responsible for receiving, stowing, issuing, and shipping 16,000 line items monthly during deployment.

S-9, the Logistics Support Center, provides the focal point for all surface support requirements.

TRAINING

The Training Department consists of three divisions. Each division has a separate and distinct role, yet each works toward the same goal: the best possible service to the crew.

Training Administration is responsible for obtaining school quotas for military and civilian courses, obtaining funding for the member and preparing orders for the member's travel. "Familiarization and indoctrination" is provided for all new personnel reporting to the command.

The Educational Services Office (ESO) is responsible for administering all rating exams and all other military and higher educational testing; education service record entries; and the Program Afloat College Education (PACE) and High School Completion Program.

The Counseling And Assistance Center (CAAC) is responsible for screening and counseling all personnel involved with substance abuse.

3-M

Personnel assigned to the 3-M Office administer the Navy Ship's Maintenance and Material Management System on board CARL VINSON. Through effective management, the Planned Maintenance System (PMS) and the Maintenance Data System (MDS), the 3-M Office strives to ensure maximum equipment operational readiness throughout the 250 work centers aboard ship. The 3-M Office also operates the Ship's Force Overhaul Management System (SFOMS) and develops work packages for the ship's scheduled maintenance availabilities.

**WINNERS OF
THE BATTLE EFFICIENCY
BLACK "W"
AWARD
FOR COMNAVIAIRPAC
JULY 1983 — DEC. 1984**

WEAPONS

The Weapons Department is tasked with the onload, stowage, assembly, strikeup and rapid, efficient delivery of ordnance to the hangar bay or to the flight deck. On the flight deck Weapons personnel move the ordnance to the waiting aircraft.

G-1 Division personnel move and supervise the loading, unloading, arming and disarming of all ordnance.

G-2 Division is responsible for the safe stowage and assembly of all conventional ordnance. G-2 personnel are also responsible for the upkeep of the conventional weapons magazines.

G-3 Division operates and maintains a sophisticated weapons elevator system capable of delivering all types of

ordnance to either the hangar bay or the flight deck.

G-4 Division runs the ship's armory. These personnel handle all of the ship's small arms and ammunition. They also provide courses to familiarize personnel with small arms and qualify them for ribbons.

G-5 Division, the newest of the divisions in the Weapons Department, handles all of the 3-M, the PMS and coordinates the SRA for the department.

W Division is responsible for the upkeep of the SASS spaces.

Ordnance Control or AWMCS provides the coordination for these divisions during a weapons movement.

CARRIER AIRWING 15

CAPT William Switzer
Commanding Officer, CVW-15

Captain William H. Switzer III is a native of Charleston, W.Va. He entered the Navy in July 1965 through the Aviation Officer Candidate program after receiving his Bachelor of Science Degree in industrial management from West Virginia Institute of Technology. He was commissioned as an ensign in October 1965.

Following flight training and designation as a Naval aviator in March 1967, he reported to VF-124 as a fleet-ready replacement pilot. In February 1968, after training in the F-8 CRUSADER, he was assigned to VF-191 aboard USS TICONDEROGA (CVA-14), which was deployed in the Gulf of Tonkin. After completing two combat cruises, he reported to VT-25 in January 1970 at NAS Beeville, Texas, as a flight instructor in the F-9. In October 1970, CAPT Switzer was selected as a member of the Navy's Flight Demonstration Team, the Blue Angels, flying the F-4 PHANTOM. After flying for the Blue Angels from 1971 to 1972, he received orders to report to VF-51 after completing refresher training in the F-4 at VF-121. Joining the SCREAMING EAGLES in July 1973 aboard USS CORAL SEA (CV-43), CAPT Switzer completed two cruises and served as the Operations Officer.

From July 1975 to August 1977, CAPT Switzer served as the Flag LT/Aide to the Commander in Chief U.S. Naval Forces Europe (CINCUSNAVEUR) in London, England. Following this tour he was assigned to report to CVW-15. While completing training in the F-14 TOMCAT in VF-124 he reported to Commander, Carrier Airwing FIFTEEN in January 1978 as the Operations Officer. In January 1980, Switzer reported as Executive Officer of VF-24 and in April 1981 took over as Commanding Officer. In July 1982 CAPT Switzer became COMFITAEEWINGPAC Operations Officer. In May 1984 CAPT Switzer assumed command of Carrier Airwing FIFTEEN.

CAPT Switzer's decorations include eight Air Medals, the Navy Commendation Medal with Combat "V," Presidential Unit Citation, Meritorious Unit Commendation Ribbon, Vietnam Cross of Gallantry with Palm and various campaign and service medals for the Vietnam conflict. He has over 4,600 hours and 750 carrier landings.

CAPT Switzer is married to the former Pamela Morrison of Okolona, Miss. They reside in San Diego, Calif., with their two daughters, Tara and Chelsea.

SCREAMING EAGLES

Fighter
Squadron
Five-One

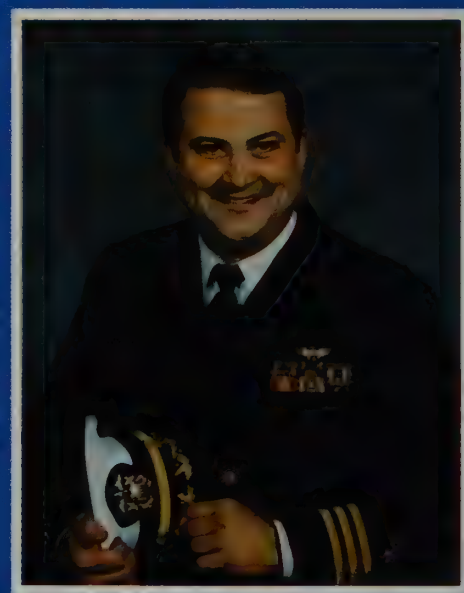

Fighter Squadron FIFTY-ONE is the oldest fighter squadron providing continuous service in the Pacific fleet. Originally commissioned as the VF-3S STRIKING EAGLES, the squadron went through numerous changes before becoming the VF-51 SCREAMING EAGLES in 1948.

The EAGLES flew several fighters before converting to the sleek, black-tailed F-14 TOMCATS they fly today. From the CURTISS F6C-4 biplane in 1927 to the F-8 CRUSADER and the F-4 PHANTOM II, the EAGLES have made the transition to the jet age and supersonic era with ease and excellence.

In 1979, VF-51 made its first deployment with TOMCATS aboard the USS KITTY HAWK (CV-63) and in March 1983, the EAGLES deployed on board the Navy's newest nuclear-powered aircraft carrier, USS CARL VINSON (CVN-70).

In keeping with a long and proud heritage, Fighting FIFTY-ONE proudly displays once again the SCREAMING EAGLES insignia on its F-14 TOMCATS. At VF-51, professionalism continues. FLY — FIGHT — WIN.

VF-111 SUNDOWNERS

Fighter Squadron
One-Eleven

Fighter Squadron ONE HUNDRED ELEVEN was initially commissioned VF-1 in October 1942. VF-1 participated in engagements at Luzon, Formosa, and Leyte Gulf where the squadron registered 56 Japanese aircraft kills over a period of four months. For so effectively downing the rising sun symbol of Japan, the squadron earned the nickname it carries to this day: the SUNDOWNERS.

In July 1948, the squadron was redesignated as VF-111. Two years later, flying the F9F-2 PANTHER, the squadron entered the Korean conflict, where it became the first Navy jet squadron to down a MIG-15.

VF-111 made seven Vietnam combat cruises, flying more than 12,500 missions over North and South Vietnam, Cambodia, Thailand and Laos.

In 1971, the SUNDOWNERS joined Airwing FIFTEEN and began making the transition to the F-4 PHANTOM aircraft, which it utilized until the fall of 1977. The squadron returned from a Mediterranean cruise aboard FRANKLIN D. ROOSEVELT in late April 1977.

Following an extensive period of transition, the SUNDOWNERS officially "stood

D.G. Bjerke
1 July 83 — 17 Dec. 84

up" in F-14's in October 1978, and completed two WESTPAC/Indian Ocean deployments with KITTY HAWK. The SUNDOWNERS arrived aboard the Navy's newest aircraft

CDR T.L. McPherson
C.O. 17 Dec. 84

carrier, CARL VINSON, in January 1983 for its maiden around-the-world-cruise and served proudly on the 1984-85 CVN-70 WESTPAC.

VA-27 CHARGERS

Attack Squadron
Two-Seven

Attack Squadron TWENTY-SEVEN was commissioned Sept. 1, 1967, by Commander G.T. Pappas and commenced A-7A training under the operational control of Attack Squadron ONE TWENTY-TWO. The squadron insignia consists of a hand-held mace with a sky and cloud background. The design symbolically depicts the power and responsibility VA-27 carries in its role as a strike component of the Naval air force.

The CHARGERS have completed twelve Pacific deployments and achieved such awards as the Admiral Clarence Wade McClusky Award, the COMNAVAIRPAC Safety Award, the Battle Efficiency "E," and the Golden Anchor for the highest retention rate in the Light Attack community.

VA-27, currently homeported out of NAS Lemoore, Calif., has served aboard the USS CONSTELLATION (CVA-64) and the USS CORAL SEA (CV-43). In September 1983 the squadron was reassigned to Carrier Airwing FIFTEEN, which is attached to USS CARL VINSON (CVN-70).

VA-97 WARHAWKS

Light Attack
Squadron Nine-Seven

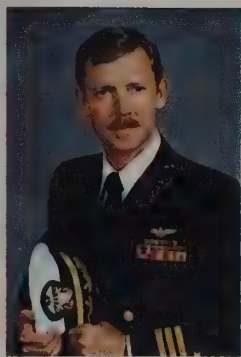

Attack Squadron NINETY-SEVEN consists of more than 290 enlisted men, 21 officers and 12 A-7E aircraft. Commissioned in June 1967 to fly A-7A CORSAIR II aircraft, Light Attack Squadron NINETY-SEVEN deployed out of NAS Lemoore, Calif., operating from the deck of the USS CONSTELLATION (CVA-64). On their first deployment, WARHAWK pilots flew against heavily-defended targets in North Vietnam. In 1970, the WARHAWKS transitioned to the improved A-7E CORSAIR II and returned to the Vietnam combat arena for two more deployments aboard USS ENTERPRISE (CVN-65). Following three more cruises aboard the Big "E" and subsequent deployments with USS CORAL SEA (CV-43), the WARHAWKS joined CVW-15 assigned to USS CARL VINSON (CVN-70).

VA-97 honors have included two Battle Efficiency "E" 's, the Admiral Clarence Wade McClusky Award, all major CVW-15 end-of-cruise awards for the last deployment and four CNO Annual Aviation Safety Awards. The WARHAWKS have also achieved over five years and 17,000 hours of accident-free flying.

VA-52 KNIGHTRIDERS

All-Weather
Medium Attack

The KNIGHTRIDERS trace their ancestry back to Reserve Fighter Squadron 884, originally commissioned at NAS Olathe, Kan., shortly after World War II. On February 23, 1959, VA-52 was created. In March 1960, the squadron made the first of seven cruises flying A-1 SKYRAIDERS aboard USS TICONDEROGA (CVA-14).

In 1967, VA-52 was transferred to NAS Whidbey Island and made the transition to the A-6A INTRUDER. With new aircraft, they operated from USS CORAL SEA (CV-43) with CVW-11, making numerous combat cruises to Southeast Asia and earning the "Battle E" in 1973.

Through the next seven years, VA-52 transitioned to the A-6E TRAM with its forward-looking infrared and laser ranging and designating (FLIR) capability, and as a part of Airwing FIFTEEN won the COMMATVAQWINGPAC bombing competition and the 1980 CNO Safety Award.

In March 1983, the squadron left Norfolk, Va., aboard USS CARL VINSON (CVN-70) with the ship's first Airwing, CVW-15. During the Operational Readiness Evaluation, VA-52 was the only squadron to receive a mark of "outstanding" and later won the "Tailhook" award for the best landing grades. The KNIGHTRIDERS deployed again with CARL VINSON for the 1984-85 WESTPAC and received the "Battle E" for 1984.

VS-29 DRAGONFIRES

Anti-Submarine
Warfare

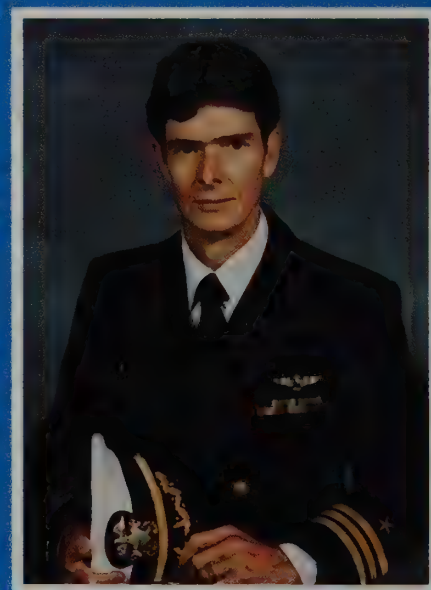

Air Anti-Submarine Squadron TWENTY-NINE was commissioned April 1, 1960, aboard USS BENNINGTON (CVS-20), with eleven S2F aircraft assigned.

The DRAGONFIRES' early missions involved recovery of the MA-8 MERCURY space capsule in 1962 and 1963 aboard the USS KEARSAGE (CVS-33). Numerous WESTPAC deployments saw VS-29 transition to the S2E and S3A VIKING aircraft.

In January 1983, VS-29 boarded USS CARL VINSON (CVN-70) for its around-the-world cruise. Homeported at NAS North Island, the DRAGONFIRES sent detachments to both NAS Fallon, Nev., and NAS Whidbey Island, Wash., in preparation for the CARL VINSON's second deployment.

Along with uncounted numbers of individual awards for outstanding performance of duty, VS-29 has been awarded the following: CNO Safety "S" in 1961, 1973, 1978, and 1983 and the COMNAVAIRPAC Battle "E" in 1965, 1966, and 1961. The DRAGONFIRES have flown over 49,000 accident-free hours spanning 15 years, demonstrating readiness and professionalism through safety.

VAQ-134 GARUDAS

Tactical Electronic
Warfare Squadron

VAQ-134 was originally commissioned June 7, 1969, at NAS Alameda, Calif. The GARUDAS, flying the EKA-3B SKYWARRIOR, won the Pacific Fleet Battle Efficiency "E" in 1969 and 1970. After decommissioning in late 1971, VAQ-134 was reactivated as an EA-6B PROWLER squadron in 1972 and homeported at NAS Whidbey Island.

The EA-6B PROWLER, incorporating the most sophisticated tactical electronic jamming and surveillance systems in the world, is designed to protect the air wing and ship from radar-guided weaponry.

The GARUDAS have six western Pacific, two Mediterranean and four Indian Ocean deployments to their credit, including the around-the-world cruise and the recent WESTPAC/Indian Ocean deployment with USS CARL VINSON (CVN-70) and Carrier Airwing FIFTEEN. The squadron has been assigned to six different carrier/airwing teams and has distinguished itself on numerous occasions in its short history. It was awarded the Battle Efficiency "E" of COMNAVIAIRPAC in 1969, 1971, 1977, 1978, and most recently 1984. VAQ-134 was also the winner of the Admiral Arthur W. Radford Award.

HORMEL
HAWGS

Carrier Airborne Early
Warning Squadron 114

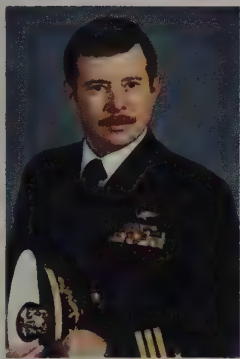

The Hormel HAWGS of Carrier Airborne Early Warning Squadron ONE HUNDRED FOURTEEN began their history as VAW-11 Detachment CHARLIE. The detachment deployed aboard the USS KITTY HAWK (CV-63) in September 1962, flying the E-1B TRACER. In October 1965, Detachment CHARLIE transitioned to and was the first VAW unit to deploy with the GRUMMAN E-2A HAWKEYE. On April 20, 1967, VAW-114 was commissioned aboard KITTY HAWK while at sea in a combat zone.

Between November 1967 and November 1981, VAW-114 made nine additional deployments to the Western Pacific as part of Airwing ELEVEN. During this time, VAW-114 earned its first COMNAVAIRPAC Battle "E" and as part of Airwing ELEVEN was awarded the Presidential Unit Citation. In 1981 the squadron won their second Battle "E."

Flying the improved version of the E-2C ARPS/PDS, VAW-114, attached to Carrier Airwing FIFTEEN, departed in March 1983 aboard USS CARL VINSON (CVN-70) on the ship's maiden voyage around the world. The squadron has distinguished itself during both the world cruise in 1983 and the squadron's second deployment with the CARL VINSON in 1984. The HAWGS have celebrated 14 years of accident-free flight operations.

BLACK KNIGHTS

Helicopter Anti-Submarine
Squadron Four

HS-4 was commissioned on June 30, 1952, at U.S. Naval Auxiliary Landing Field, Imperial Beach, Calif. Since commissioning, the squadron has flown many different types of helicopters, including the HO-S3, the HUP-2, H-19, SH34J and the SH-3 series. The squadron is now equipped with six SH-3H turbine-powered helicopters.

HS-4 was the first ASW helicopter squadron to deploy aboard an aircraft carrier, the USS RENDOVA (CVE-14). In 1961, it became the first command in COMNAVAIRPAC to achieve the "round-the-clock" ASW capability. It was this achievement that earned HS-4 the title of BLACK KNIGHTS.

HS-4 has amassed numerous awards in its 31-year history. The squadron is a six-time winner of the Chief of Naval Operations Aviation Safety Award and received the Arleigh Burke Fleet Trophy in 1978. HS-4 has also earned five Battle "E" Awards and are three-time winners of the Captain Arnold J. Isbell trophy for ASW excellence. HS-4 received the Sikorsky "Excellence in Maintenance" Award in 1979, 1982 and 1983.

HS-4 is presently homeported at NAS North Island, and deploys aboard USS CARL VINSON (CVN-70) as part of CVW-15.

VQ-1

FLEET AIR RECONNAISSANCE SQUADRON

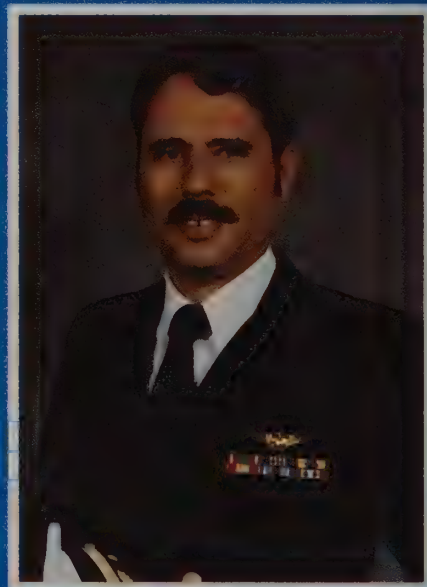

VQ-1 is the Navy's largest operational squadron, with a compliment of approximately 800 enlisted men and 100 officers.

The squadron presently operates five different types of aircraft, including the VA-3B, EA-3B, EP-3B, EP-3E and P-3B. Its primary mission is conducting electronic reconnaissance in support of fleet operations, in order to obtain information and intelligence on areas and targets of naval interest. To better perform its assigned missions, VQ-1 maintains detachments at various WESTPAC locations and on all aircraft carriers operating in the Pacific.

With the arrival of Detachment CHARLIE, USS CARL VINSON (CVN-70) was able to greatly extend its ability to gather vital information in support of daily operations. Time and time again the WHALES of VQ-1 Det CHARLIE provided invaluable support, continually demonstrating the vital need of the unique capabilities the WHALES brought to USS CARL VINSON.

It was with many unforgettable memories that Detachment CHARLIE departed CARL VINSON in early May 1985.

FOO DOGS

Fleet Logistics Support
Squadron Five-Zero

Fleet Tactical Support Squadron FIFTY was commissioned Oct. 1, 1966, at Naval Air Station, Atsugi, Japan. After several homeport and detachment locations, VRC-50, stationed at Naval Air Station, Cubi Point, Republic of the Philippines, was redesignated Fleet Logistics Support Squadron FIFTY in April 1976.

Operating the C-2A GREYHOUND, the US-3A and other aircraft, the men and women of VRC-50 provide air logistics support, carrier onboard delivery (COD) and rapid air transport support for the Seventh Fleet. VRC-50 detachments operate from Guam, Korea, Japan and Indian Ocean carriers.

The squadron won the National Defense Transportation Award in 1968 for its contributions in the Far East; the Armed Forces Expeditionary Medal in 1975 for its vital role in the Vietnam and Mayaguez incident evacuation efforts; and the National Defense Transportation Award in 1978 for its sustained outstanding performance in military transportation.

Wherever Seventh Fleet units operate, the VRC-50 FOO DOGS are ready to provide air logistics support.

In Memoriam

CROSSING THE BAR

Sunset and evening star,

And one clear call for me!

And may there be no moaning of the bar,

When I put out to sea,

For tho' from out our bourne of Time and Place

The flood may bear me far,

I hope to see my Pilot face to face

When I have crost the bar.

— Alfred Lord Tennyson
